Good morning, Alex.

Any help on this would be appreciated. Months with no sense of action or progress. Thank you, Dennis

Subject: PMN Status Inquiry

We've had PMN (P-18-0170) under review since May 2018 and we are unclear on process and timeline. The new substance has won several awards, including a R&D 100 award, and just won a 2019 Edison Award (see press release below). This is an example of new technology which "...reduces water, dye, energy, and chemical use..." in the textile dyeing process.

Can you please provide a sense of status and possibly target end date? We are available to meet if you think that is warranted. Thank you, Dennis

MIDLAND, Mich. - April 08, 2019

Silver to ECOFAST™ Pure Sustainable Textile Treatment: ECOFAST™ Pure is a breakthrough technology that enables unique, brighter colors on cotton textiles while helping address sustainability challenges in the industry, including quality and consumption of water. This patented technology reduces water, dye, energy and chemical use in the dyeing process and meets the ZDHC Roadmap to Zero Programme standards. ECOFAST Pure is compatible with reactive, direct and acid dyes and can be applied to knit and woven fabric, denim and garments.
